

COLLEGE
OF THE
FLORIDA KEYS

HOT STUFF BLOWN GLASS & RAKU

Students will work to develop a body of work and glazes to be fired in the Raku process. The way this class will differ from past Raku classes will be with addition of Master Glass Artist Wes Hunting. Mr. Hunting will discuss glass theory and numerous glass blowing techniques will be demonstrated. Students will have the opportunity to blow glass with the master. Upon Mr. Hunting's departure, the students will work to create a Raku vessel inspired by their foray into the world of hot glass.
