Program Description:

The College Credit Certificate in Paramedic offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards, relevant technical knowledge and skills for certified Emergency Medical Technicians (EMT) to prepare for a career as a paramedic. Upon completion of the 42 credit hours of coursework, students are able to sit for the National Paramedic Exam, and upon passing the exam, work as a Paramedic. Interested students must be certified as an Emergency Medical Technician, possess a valid EMT license, and have completed BSC 1085 and BSC 1085L prior to enrolling in Paramedic classes. Students who are accepted into the program will also need to meet medical clearance criteria and pass a criminal background check and drug screening. Students who do not meet these requirements will be removed from the program.
